DETAILED ACTION

1. This application has been assigned to a new Examiner. Please see the Conclusion section for the new Examiner's contact information.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to establishing a connection between a device and a server, classified in class 709, subclass 227.
 - II. Claims 19-30, drawn to coupling devices together using identical interface units, classified in class 709, subclass 220.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as monitoring a plurality of communication channels for one or more link pulses for one of the devices and establishing a connection to the device with the communication channel monitored to have the link pulses. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2142

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
